Wisconsin State Superintendent of Public Instruction's reports

reformatted from the original and including:

Annual report of the State Superintendent of Public Instruction, <1853>, year 1854-1855, October 1st, 1857,

Report, <December 31st 1853>, 10th (December 10th, 1858)-11th (December 10th, 1859)

Annual report, 1856

Annual report on the condition and improvement of the common schools and education interests of the state of Wisconsin, 12th (year 1860)

Annual report of the Superintendent of Common Schools of the State of Wisconsin, <12th (year 1861)>

Annual report of the Superintendent of Public Instruction of the State of Wisconsin, <year ending August 31, 1868>

LLMC 01-220t

OFFICE OF SUP'T OF PUBLIC INSTRUCTION,

MADISON, Dec. 10th, 1859.

TO HIS EXCELLENCY, A. W. RANDALL,

Governor of the State of Wisconsin:

SIR:—I herewith transmit, through you, to the Legislature, the Annual Report of this Department.

I have the honor to be, with much respect,

Your obedient servant,

LYMAN C. DRAPER.

ELEVENTH ANNUAL REPORT.

To the Legislature:

In accordance with the provisions of law, I have the honor to submit to your body the ELEVENTH ANNUAL REPORT of this Department.

ABSTRACT OF SCHOOL REPORTS.

A full abstract of all the reports received from the Clerks of the County Boards of Supervisors, will be found appended to this Report. Probably for the first time in the history of the State have the returns been received from every County in time for the use of the State Superintendent in making up his Annual Report. Burnett County is not taken into the account, which has never yet been organized, and of course no report from it need be expected.

Number of Children.—The whole number of children of school age, between the years of four and twenty years, is 278,871—showing an increase over last year of 14,519. Last year's increase over the preceding year was 22,807; and the year before over its predecessor was 27,656. The great diminution of increase for the past two years, and especially for the past year, must be attributable, in a great measure, to the check given to immigration to our State on account of the stringency of the times.

School Attendance.—Owing to an unfortunate omission in a portion of the blanks, the returns are not sufficiently complete

to afford any reliable data as to school attendance; but from the real poverty of the people in many of the newly settled counties, and their consequent inability to clad their children comfortably during the severities of the cold portion of the year, it may be presumed that the attendance has not been quite so large as last year. I have been informed, upon what I deem credible authority, that in the County of Columbia alone, fully one thousand children were unable to attend school last winter, on account of their parents being unable to provide them with the necessary shoes and clothing. As there were nearly 97,000 children of school age last year who did not attend school, we may conclude that the number the past year has considerably exceeded one hundred thousand. It is a melancholy reflection, that in this enlightened age, with all the facilities afforded for free education, with the liberality of the General Government, and the fostering care of the State, more than one-third of all our children of school age are growing up in ignorance of even the rudiments of an education, and ignorant, moreover, of the weighty responsibilities that will soon devolve upon them as citizens of a great State, boastful of its progress and intelligence. I ventured, in my last Report, to make some suggestions on this subject, and hence need not repeat them here.

Length of Schools.—Ten years ago, the average length of time the schools in the State were taught, was a trifle less than four months. This average has slowly but steadily increased, until last year it reached an average of five months and three-fifths. This year, from the poverty of the people, no doubt, we find a slight diminution—the statistics showing but five and a half months. It should be a source of real gratification, that our people, amid the most oppressive poverty they have ever probably experienced, have so nobly and heroically sustained their schools—and they have doubtless been able to do so, by exercising, oftentimes, the most rigid self-denial. I should repeat my suggestion of last year, that the time required by law for the maintenance of public schools, in order to entitle them to share in the School Fund distribution, be increased from three to four months; but I am persuaded that the people in nearly all the sparsely settled frontier counties are yet too poor to meet this increased demand; and while it should be done at the earliest practicable day—and in due course of time, gradually still farther extended—it would not now, in my opinion, be wise to attempt it. We should all feel for the distresses of the poor, and not place too heavy burthens upon them. The statistics show that no less than six-

teen counties have the past year failed to maintain an average of four months school—and these, as might be expected, are all frontier counties, unless Columbia and Sauk should be regarded as exceptions.

Number of Districts.—The number of school districts in the State which have reported, is 3,538, together with 118 unreported, and 1,611 parts of districts. Last year the number of districts reported were 3,181, together with 183 unreported, and 1,566 parts of districts. The unreported districts are over one-third less than last year, and the reported districts show an increase of 357, and the parts of districts 45. Last year there were 87 parts of districts that failed to make a report; this year but 78. The total number of districts in the State, estimating two and a half parts, upon an average, to a joint district, is 4,331.

Value of School Houses.—The total valuation of the school house property in the State ten years ago was $75,810 75; in 1857, $863,478 49; in 1858, $1,127,191 69; and now, in 1859, $1,185,191 73—showing an increase in valuation, since last year, of 58,000 04. The highest valuation of any school house in the State, is one in Milwaukee, at $20,000; the lowest valuation is one in the town of Scott, in Sheboygan County, at 25 cents. Milwaukee, as already indicated, reports the most costly school house, $20,000; Janesville one at $14,000; Kenosha one at $12,000; La Crosse one at $10,000; Sheboygan one at $8,000; Dodge and Winnebago one each at $7,000; Racine, one at $6,000; Dane and Grant one each at $5,000; Jefferson one at $4,540; Crawford one at $4,323; Brown and Ozaukee one each at $4,000; Portage one at $3,500; Sauk and Waukesha one each at $2,500; Fond du Lac, Iowa, Juneau, Manitowoc, Richland and Waushara one each at $2,000; Green and Oconto one each at $1,000; Columbia, Eau Claire, Jackson and Washington one each at $1,500; La Fayette one at $1,400; and Bad Ax and Green Lake one each at $1,000.

Ten years ago there were 511 school house sites containing less than an acre; in 1857, 2,369; in 1858, 3,060; this year, 3,367. There were, ten years ago, 582 school house sites uninclosed; in 1857, 2,470; 1858, 3,099; this year, 3,301. This would exhibit about one in every five and a half uninclosed—and, as a matter of course, few of these can be provided with shade trees, and other out-door conveniences.

There were, ten years ago, 331 school houses without blackboards; in 1857, 940; in 1858, 1,072; this year, 1,047. With an increase of 357 districts in the State, and 45 parts of

districts, there has been a decided increase in the supply of black-boards. The statistics show but comparatively a few of the school houses supplied with outline maps.

Teachers' Wages.—Ten years ago, the average of wages paid to male teachers per month in the State, was $15 22 per month, and to female teachers, $6 92; in 1857, to male teachers, $24 60, and to female teachers, $15 16; in 1858, to male teachers, $27 02, and to female teachers, $14 92; this year, owing to hard times, we find teachers' wages somewhat reduced, the average paid per month to male teachers being $22 93, and to female teachers, $14 29. In Oconto county, the highest average wages were this year paid to male teachers, $37 20; and in Sauk county the lowest, $12 34; while in La Pointe county the highest average wages per month were paid to female teachers, $33 33; and in Portage county the lowest, $8 87. It will be observed, in the following table, that since 1849, teachers' wages have largely advanced, and especially those of female teachers, who are so well adapted, when properly fitted, for the noble work of imparting instruction to the young:

Years.	Average am't paid Male Teachers.	Average am't paid Female Teachers.
1849,	$15 22	$6 92
1850,	17 14	8 97
1851,	17 15	8 35
1852,	15 83	8 64
1853,	18 17	9 94
1854,	18 75	11 00
1855,	23 10	12 08
1856,	25 38	13 80
1857,	24 60	15 16
1858,	27 02	14 92
1859,	22 93	14 29

School Libraries.—Last year the total number of School Libraries was 1,375, with 38,755 volumes; this year only 1,250 Libraries have been reported, with 41,997 volumes. Thus while we have 125 less Libraries reported this year, they exhibit an increase of 3,242 volumes. In 1857, 19,504 volumes were loaned for reading; last year, 34,104 volumes were taken out; and this year, 51,062—thus showing a gratifying increase in taste for reading. With the improved system of Town School Libraries, with larger collections and a greater

variety of books, we may reasonably calculate on a yet greater demand for books for reading, both by the old and the young, than ever before.

PROGRESS AND ENCOURAGEMENTS.

Thus, we perceive, that Wisconsin, notwithstanding the unequalled pressure of the times, is steadily advancing in her educational interests. The marked improvement in our Normal Schools, and especially the gratifying success which has attended the Teachers' Institutes, under the direction of Chancellor BARNARD, held during the past Autumn, should be regarded as among the most hopeful signs of the times. When teachers are alive to the great importance of their calling, and evince an ardent desire to fit themselves for their high duties, we may be sure the schools throughout the State will feel the beneficial influence which must naturally result from such feelings and such efforts. Last year the total amount paid out in the State for teachers' wages in our Common Schools, was $334,853 96; this year $536,860 66—exhibiting an increase of over *two hundred thousand dollars* in a single year, which almost staggers belief. Such an increase in expenditure for the maintenance of Common Schools—of which more than two thirds of the whole amount was raised by direct tax—is, in my estimation, highly commendable to the energy, intelligence, and self-denial of our people in such a time of unexampled severity.

THE SCHOOL FUND.

On the 1st of October, 1858, the School Fund proper, after deducting what goes to make up the Normal Fund, was $2,855,806 32. On the 1st of October, 1859, after deducting the Normal Fund, we find the School Fund proper amounting to $2,786,767 03. Of this, there remained in the Treasury, September 30th, 1859, $32,647 95; which deducted from the principal, leaves $2,754,119 08, productive, drawing interest at the rate of 7 per cent. per annum, which amounts to $192,788 34. To this is to be added 25 per cent. of Swamp Land Fund Income on hand, September 30th, 1859, amounting to $6,717 88; and School Fund Income on hand at that date, paid in since the last apportionment, $45,766 19—thus showing a total of $245,272 41, *if all the interest should be paid prior to the 5th of March next*, subject to apportionment by the State Superintendent in March ensuing. By the same process, we had $240,002 11 of School Fund Income which

should have been ready for apportionment in March, 1858; but from failures to pay the interest promptly, it fell short some $70,000, leaving barely $169,185 28 to apportion, which yielded 65 cents to each child of school age in the State. It may well be doubted if there will be a much larger amount for apportionment next March, than there was last March. If the Legislature should firmly resist all appeals for an extension of the time for the payment of interest, then we might perhaps count on fully $200,000, or possibly $210,000, for apportionment. Estimating it at $200,000, and deducting from this 10 per cent. for Town School Libraries, we should have $180,000 for apportionment among some 278,871 children, which might give very nearly 65 cents, the same as last year, to each child. But if the bad policy of extending the time for the payment of interest is continued, we could expect no larger proportion of the amount due to be paid in, than was paid in last year; which would, in round numbers, amount, with what is on hand, to $174,000—and deducting one-tenth for Town Libraries, we should have $156,400 for apportioning, or about 56 cents to a scholar.

We find the School Fund proper $69,039 29 less this year than last. The large amount of School and Swamp lands forfeited to the State, which will this year reach very nearly 400,000 acres, admonish us, that the School Fund, upon which so many of the children of the State rely for all the education they will ever receive, should be guarded with unusual care.—There is great danger of this sacred Fund becoming much farther reduced, from forfeitures of School and Swamp lands. It seems to me, that it behooves the Legislature to examine into the subject, and see if some additional legislation is not demanded, to restrain the counties from imposing excessive taxation on non-resident School, Swamp and University lands. Many, very many, of the forfeitures which occur, result, I am persuaded, from this cause; and thus hundreds of thousands of acres are being thrown back upon the State, after the purchasers have paid the interest for several years, and thus the School, University, Normal and Drainage Funds are diminished, and the annual accruing interest lessened. While I would make no plea designed to benefit the speculator alone, I do feel that any violation, in letter or spirit, of that part of our Constitution which requires that "the rule of taxation shall be uniform," is unjust towards those who have purchased these lands in good faith, and are annually paying their seven per cent. interest for the maintenance of Free Schools; and permitting counties to impose exorbitant taxes upon non-resident lands of this class, is inflicting a real injury upon the whole

State, and especially upon the poor, by causing the forfeiture of the lands, and the diminution of the several funds, and their respective incomes, set apart for State educational purposes.

I will venture to cite a case in point. In the *State Journal*, of February last, "an unfortunate land-owner," as he termed himself, stated that he held a school section in the town of Bovina, Outagamie county, town 24, range 16, section 16; that it was understood, at that time, there was only ONE settler in the entire township of 36 miles square, and with little probability of the land being required for settlement or cultivation for many years. That the taxes for the year 1857, returned to the County Treasurer, amounted to the sum of $148 65, and for the year 1858, to the sum of $85. The first mentioned tax was returned by the County Treasurer to the State Treasurer; and under Chapter 82 of the General Laws of 1856, he added 25 per cent., amounting to $37 23 — making the tax of 1857, $185 88. The same course, it was stated, would be followed with the tax of 1858, to which, on the 1st of June, 1859, would be added $21 25. Assuming these taxes to have been paid on the first of June, 1859, the amount of tax was $233 65, and the 25 per cent. added, $68 48, making together $302 13— being a charge of $68 48 on the non-payment of $148 65 for one year, and $85 for one day. The aggrieved writer closes his case with this pertinent inquiry: "May I be allowed to ask, if a charge exceeding 12 per cent. per annum, on the loan of money, is designated as usury, what is the proper name of a transaction, such as the above, to which the State is a party?"

I have cited this case as one of a large class, as giving a clue to the causes why so large an amount of School, University and Swamp lands are forfeited; and then the excessive county taxes are paid by the State, which eventually comes out of the sacred Funds dedicated to the education of our children. I appeal to the Legislature to give to this subject their careful consideration, and see if a proper remedy cannot be applied, and our educational funds protected from these unjust forays upon them.

By Chapter 201, of the General Laws of 1859, certain penalties imposed for neglect to pay interest when due, were to be remitted; by the operation of which, some fifteen thousand dollars, as was estimated by the Secretary of State, would have been taken from the School and University funds, had not the Commissioners of the School and University lands, for certain reasons which seemed conclusive to them, as they did also to me, declined remitting any penalties under the law in question. It would seem, from the investigations of the Commissioners, that the law was not passed according to the constitutional re-

quirements. It appears to me, that this law, if not null and void, should be promptly repealed. Thousands of contracts are annually made in our State with teachers, relying in good faith upon the punctuality of the State in making the apportionment; but when penalties are freely remitted, we shall find a growing laxity in paying school interest, calculating upon bad precedents for either extension of time, or remission of penalties—and then the consequence is, either a comparatively small amount to apportion, or a postponement of the time of apportionment, either of which works a sad disappointment to the over four thousand school districts in the State, and, if postponed, often causes a failure on the part of the districts to pay their teachers according to contract at the close of their term of service.

In my last year's Report, I took occasion to enter somewhat minutely into the condition of the School Fund, and the sources for its augmentation. Nothing has since occurred that materially affects those statements and conclusions. If our legislators could but fully realize the importance of our Common School educational interests, they would, I am sure, labor more earnestly for the preservation of the School Fund intact, and seek diligently how to increase it. When we bear in mind, that for teachers' wages, libraries, school houses and fixtures, we are annually paying nearly *seven hundred thousand dollars*, or, upon an average, two and a half dollars annually for the education of every child of school age in the State, we begin to comprehend something of the vastness of the educational interests we have at stake. And great as it really is, this, after all, is but a sordid view of the matter, and bears no comparison to that higher view we should all take, of the intellectual advancement and future well-being of nearly three hundred thousand children, whose chief, if not only, reliance is on the Common Schools provided for them.

Whatever tends to permanently increase the School Fund, will, of course, prove a lasting blessing to the educational interests of the State. I think no man can make a candid examination into the condition of our School Fund, which is now actually diminishing in amount, and, in this connection, observe the steady annual increase of children of school age, but must be impressed with the stern, unpleasant fact, that the amount per scholar to be annually apportioned by the State must gradually decrease, unless provision is speedily made for the augmentation of the School Fund.

I doubt not that proper efforts will continue to be made to obtain from the General Government the five per cent. fund so long withheld from the State, and the 140,000 acres withheld

of the original 500,000 acre school tract. These would make quite an addition to the School Fund. The policy of hurrying the school and swamp lands into market at the low prices at which they now rule, is questionable. Might it not be the wiser policy, to materially increase their price, even if it should postpone their sale for a few years? It would be better, it seems to me, that these lands when sold, should be sold only to actual settlers, and whatever excess beyond the present low price is paid for them, should go directly into the educational funds of the State, rather than into the pockets of speculators.

I urged in my former Report, that the 25 per cent. of the net proceeds of the sale of the swamp lands taken from the School Fund and added to the Drainage Fund, be restored to the School Fund. If this could be done—and I think it could, and still leave, as I endeavored last year to show, amply enough for all reasonable drainage purposes—and the swamp lands should be judiciously disposed of, we might safely calculate on an addition of fully one million of dollars to the School Fund, from this source alone—and such an addition, with the present number of children of school age in the State, would add over 20 cents to the present annual apportionment to each scholar.—Once more, and for the last time, do I earnestly plead for its restoration.

It will be remembered, that upon the recommendation of Hon. ROBERT J. WALKER, while Secretary of the Treasury of the United States, during President POLK'S administration, an additional section of land, in each township, was granted to the newly organized States and Territories; so that California, Oregon, Washington, Utah, New Mexico, Minnesota, Kansas and Nebraska, have received two sections in each township, double the proportional amount of other Western and South-Western States. I would respectfully suggest to the Legislature, the propriety of memorializing Congress for an additional school land grant, to such of the Western and South-Western States as have received only one section to each township—either an additional section for each township, or such other amount as may be deemed just and proper, provided the General Government has a sufficiency of unsold lands remaining in those several States to meet the object sought to be obtained. I could wish our Legislature would not only send in a single memorial, but continue to memorialize Congress each successive year, until the great purpose should be gained; and also memorialize the Legislatures of other Western and South-Western States, interested in the movement, to invite them to unite in memorializing Congress, and securing concert of ac-

tion on the part of the Western and South Western members in Congress in laboring for this noble object. And such a measure should also include a new land grant to each of our Western and South-Western State Universities—not one of which, possesses scarcely a pittance of the fund it should have, in order to accomplish the great work expected of a live and progressive University. Could such additional grants be secured for the Common School and University Funds of our Western and South-Western States, I feel quite certain that the General Government would eventually be amply remunerated in the improved education and more general intelligence of the thousands and hundreds of thousands of pioneers which these States will yet send forth to settle the plains and valleys of the unnumbered States that are destined soon to spring into existence between our western borders and the Pacific coast.

TOWN SCHOOL LIBRARIES.

On the 8th of April last, I issued a Circular explaining the provisions of the new School Library Law, with my views and hopes of the new system which that law inaugurated. As some additional legislation is required before that law can go fully into effect, it seems necessary to a proper understanding of what has been enacted, and what yet in addition is needed, that some notice of the law itself should be briefly given. I cannot do this to better purpose, than by citing the Circular issued last spring. It is as follows:

"The new School Library Law. recently enacted by our State Legislature, has four prominent provisions, namely:

"1. It provides a permanent Town School Library Fund, by setting apart for this purpose ten per cent. of the School Fund Income, subject to apportionment in 1860, and annually thereafter, together with the proceeds of a special State tax, to be levied each year, of one-tenth of one mill on the dollar valuation of taxable property.

"2. It provides that this Fund shall be set apart specifically for establishing and replenishing *Town* School Libraries.

"3. It provides that the books for these Libraries shall be purchased by public authority, and not by the local School Boards as heretofore.

"4. It provides that an extra number of the State Laws, Journals and Documents, sufficient to supply each Town and City School Library with a set, shall be printed by the State Printer, and delivered to the State Superintendent, and these shall be substantially bound, under the direction of the State

Superintendent, with the approval of the Governor, at a cost not exceeding thirty cents per volume, to be paid out of the School Library Fund.

"The precise manner in which the books shall be purchased and distributed, except that they shall be purchased "by public authority," and "distributed in some just proportion among the towns and cities of the State," is not specified in the act. As the means for the first purchase, can not, from the terms of the law, be collected and ready for use until next Spring, it was thought best not to encumber the act with details, which might have embarrassed and endangered its passage. These details, providing for the selection and purchase of the books, their distribution, and regulations for the management of the Libraries, will be carefully considered by Hon. HENRY BARNARD, the Superintendent of Public Instruction, and Prof. J. L. PICKARD of the Platteville Academy, who have been appointed by the Legislature to make such revision of the School Laws of the State as they may think necessary, and report the same to the Governor in season to be by him submitted to the next Legislature for its consideration. It need only be said in this connection, that every precaution will be taken to guard the interests of the State, and prevent, by every restriction of law, the possibility of swindling or cheating in the contract for the books—for upon the faithful investment of this sacred fund will much of the popularity and usefulness of this law depend.

"There never was a measure involving new and additional taxation, that ever passed the Legislature with such unanimity. The State Superintendent's Report, which strongly urged the Town Library system, was not laid before the Legislature until three weeks before its adjournment; Mr. BARNARD, who had been confidently expected here, and whose personal efforts and experience were greatly counted on in aid of the measure, was detained in Connecticut by severe illness; and the Library law was not introduced until within eight working days of the close of the session, and notwithstanding all these untoward circumstances, this measure—a tax measure, too, in these stringent times—passed both Houses most triumphantly, by a vote of 19 to 3 in the Senate, and 51 to 10 in the Assembly; or in the aggregate, by a vote of 70 to 13. I have no doubt that the men who supported this noble and beneficent measure, will long be remembered with honor and gratitude by an intelligent and appreciating people.

"This School Library Fund will amount to at least $35,000 annually, and will gradually increase in proportion to the increase of the School Fund Income, and the increase of the taxable property of the State. There will be something like $18,000

a year from the School Fund Income ; and one tenth of a mill tax on the dollar valuation, on $175,000,000 of taxable property in the State, as equalized last year, would realize $17,-500,—if the taxable property should be equalized, as it may be, at two hundred millions, then the income from this special Library tax would amount to $20,000 annually. I should conclude, that the Library Fund will reach not less than $40,-000 a year within the next three years. But estimating it at $35,000, it would give on an average, to each of the 650 towns and cities of the State $53 per year in books at wholesale rates ; and deducting the probable *pro rata* for the cities and villages, there would be about $40, upon an average, to each of the rural towns. Estimating the present population of the State at 850,000, and dividing it by the number of towns and cities, we should have an average of 1,333 persons for each town and city ; and $40 or $50 per year in books for this number would appear but a very moderate investment. This amount, though small, will nevertheless afford a respectable beginning for a Town School Library, when we take into consideration that a similar amount will be added annually thereafter.

"A single volume may serve as many as twenty-six persons a year, each having its use two weeks. Many School Libraries have reported twelve times the number of books loaned annually that were in the Library—each volume, upon an average, having been taken out once a month during the entire year. In the reports of the Town Libraries of Indiana, occur such expressions as the following, which will not be lost on the public mind: 'Nearly all the books have been drawn out as many as twenty-five times, many of them oftener, and quite a number of the books are not permitted to remain in the Library an hour before they are withdrawn.' Says another: 'Our Library is doing more good than anything that has ever been done by the Legislature of this State. Great interest is manifested in it here.'

"I may state as the result of ten years' experience of the District Library system in Wisconsin, that only about *one third* of the districts have any libraries at all, and those generally so small as scarcely to deserve the name,—averaging less than 28 volumes each,—and hence have utterly failed to fulfill the great mission of School Libraries. That what few books have thus been collected have been procured, at high prices, of book pedlars, and have but too generally related to *Banditti* and *Robbers*, the *Pirate's Own Book*, and other trashy and injurious works, which could only incite in the minds of children a desire themselves to become desperadoes.

"Had we continued the *District* Library plan in our State, and continued to leave the districts to procure a Library or not, as they might elect, so long would the Library system of Wisconsin, it seems to me, have proved a signal failure; but with the *Town* Library plan, as is in Indiana, Ohio, and Michigan, the State providing the Libraries for each town according to some just system of distribution, carefully selecting books suitable to meet the tastes and wants of all classes of community, replenishing them annually, so as to keep each collection fresh and attractive, we shall have, in each Library, several times the number and variety of books that any District plan could ever possess. For instance, suppose each of a dozen districts in a town was to have ten volumes for a new Library, or for replenishing an old one—the same ten volumes that would be *best* and *cheapest* for one, would be *best* and *cheapest* for all; so that in all the twelve districts there would be, in truth, but *ten* different works; while upon the Township plan there would be *a hundred and twenty* different works for the same money. Any one can readily see how much more attractive the larger number would be to both youth and adults; how many more tastes would be gratified, and how much more knowledge would necessarily be diffused among the people. The same amount of money expended on the District plan would, by a judicious State system, purchase fully one-third more volumes, besides securing a vastly better selection, and having the advantage of a uniform and far more permanent style of binding. According to the old District plan, we should always have had small and almost worthless Libraries; by the Township system, we shall soon have large, attractive, and invaluable collections; and instead of only about *one-third* of the State, as is now the case, having a few ill-chosen volumes, every town in Wisconsin will, by the new system, soon have its solid Library of the choicest works to gladden the young minds of our two hundred and sixty-four thousand children, and furnish mental food for our other six hundred thousand people.

"I presume that provision will be made, that should the citizens of any town deem proper, they may sub-divide their Town Library into two or three sections, and have them placed in as many convenient localities for six months or a year, and then interchange these sections with the other localities, and so in due time, the several sections or sub-divisions of the Library would be placed within the convenient reach of every part of the town, thus subserving nearly every facility of the District Library, with the most decided superadded advantages.

"As an instance illustrative of the strong feeling of attachment with which the Township Libraries are regarded where they have been established and tested, and how cheeerfully the expense is borne by the people, I cite the following from an excellent address by Prof. READ of our State University: "I will give the substance of a conversation which I had during my recent visit to Indiana, while in the Auditor's Office, examining the most beautiful series of books—the *Indiana School Library*. A farmer from the remotest township of the county came in. After a little, I said to him, 'GENTRY, you are heavily taxed here in Indiana; I have been running away to Wisconsin, where they have no old dead horses in the form of canals to pay for, and no interest to pay on bonds which our sharp-sighted Indiana Commissioners were cheated out of.'—'Well,' said he, 'we *are* heavily taxed, and this year, with our short crops and hard prices, it is as much as we can do in our neighborhood to pay our taxes.' 'But,' I said to him, 'it will be the policy of this Legislature to diminish taxation.' He said 'in all mercy he hoped so.' 'They will begin upon your extravagant school system. Now look at these books—what is the use of them? Do they do a particle of good?' 'Let them,' said he, 'cut off what else they please—let them even cut off the whole school tax beside, *but the books we must have.*' He then told me that the books had done his neighborhood more good, and had produced a greater change in the habits of families, than any other means of improvement which had ever been brought to bear upon the people."

"And so it will be in Wisconsin. The people will never grumble at the School Library tax, if the money is only wisely expended. The tax will be light—one cent on every one hundred dollars, or twenty-five cents on every two thousand five hundred dollars of taxable property. 'Taxes,' remarked that far-seeing statesman, EDMUND BURKE, 'taxes for education are like vapors, which rise only to descend again to beautify and fertilize the earth.'

"Such was the interest of HORACE MANN in the subject, when requested to give an expression as to the value of Town School Libraries for Wisconsin, that though ill, he said he must write a word of good cheer, *as he held the plan to be worth many more times than his life.* GEORGE B. EMERSON, a veteran and distinguished educator of New England, with the zeal of a true philanthropist, urged upon our Legislature the speedy adoption of such a system. 'I congratulate you and the State,' writes HENRY BARNARD, 'that your Legislature has enabled you to inaugurate a true Library policy—altogether in advance, in its practical bearings and completeness, in

time, of anything yet attempted.' It is, indeed, an advance upon the efforts of our sister States, all things considered; for, taking the three States which have adopted the Township system, Wisconsin will raise more money, by nearly one-quarter, than Michigan, besides having the advantage of the State purchasing the books instead of the Township Boards, as is done in Michigan; it is in advance of Ohio, whose Library Fund is provided by imposing the tenth of a mill tax, while ours is raised by the tenth of a mill tax, and one-tenth of the School Fund Income; and it is in advance of Indiana, not in the amount of tax raised, but in the permanency of the system, for in Indiana the Library Law is enacted to be in force only two years, and then has to pass the ordeal of securing a two years' renewal, and thus is subjected to the danger of overthrow by the caprice of the people, or through the mismanagement of those having it in charge. Our Wisconsin Library Law is in advance of all others in providing a copy of all State Laws, Journals and Documents, substantially bound, for each School Library.

"It is a noble and beneficent law; and will yet be regarded, when fully known, and its benefits begin to be realized, as the most important educational measure ever inaugurated in Wisconsin. I confess to cherishing no ordinary feelings of hope and pleasure in view of the unspeakable good that must inevitably result from a judicious expenditure, every twenty-five years, of fully *one million of dollars* for books to scatter among our people—procuring not less than a million and a quarter of volumes of the choicest literature of the age; and I envy not the man who cannot partake of this feeling of hope and joy, in view of the prospective progress and happiness of his race."

As nothing has been done by the Commissioners appointed by the Legislature to revise the School Laws, of course the additional provisions necessary to the proper carrying out of the new Library Law have not been jointly considered by them. I have, however, had considerable interchange of views with Chancellor BARNARD upon the subject, in a general way; and in these, I believe, we coincide. As this Library Law is justly regarded by all friends of education, in and out of the State, as a decided step in advance of all our sister States, and as unquestionably the most important educational measure ever adopted in Wisconsin, I feel an unusual anxiety that so beneficent a measure should be carried into effect under the most favorable auspices.

1. *Who should select and contract for the books?* I said to many members of the last Legislature, to Chancellor BAR-

NARD, Hon. A. J. CRAIG, and others, in conversation, several months ago, and repeatedly since, that, in my opinion, it would be unwise to confide this power and responsibility to the State Superintendent alone, however good a judge of books he might be, and however pure and above suspicion might be his reputation. It would be next to an impossibility, for any one man to have the selecting and contracting for from thirty-five to fifty thousand dollars worth of books in a single year, without exciting the ire and jealousy of those publishers whose books were not selected, or whose terms in competing for the contract were, in their estimation, either overlooked or overslaughed; and hence would arise, as has frequently been the case, first inuendoes and finally grave charges, that bribery had been resorted to by the more successful book-mongers to circumvent their competitors, and accomplish their purpose. Such things, though they might not be generally believed, would nevertheless exert an unfavorable effect upon the Superintendent's influence, and often prove exceedingly annoying to him.

Let two persons be associated with the State Superintendent to determine the books to be purchased, the style of binding, and make the contract for them. These persons should be men of the highest intelligence, possessing a thorough knowledge of books, and such a reputation that the people of the whole State would feel that their dearest interests were confided to safe hands. Thus would the State Superintendent, whose duties are always numerous and onerous, be partially relieved from a heavy responsibility, and have the benefit of able advisers and assistants in carrying successfully into effect a measure fraught with untold blessings to our people. With three such Commissioners to manage the whole subject of School Libraries, including the selection of the books, their binding, contracting for them, directing their distribution, and providing rules and regulations for the management of the Libraries, I do not see any reason to distrust their successful administration of this important trust. But, I would repeat, the two persons thus associated with the State Superintendent, should be men thoroughly acquainted with books, and deeply imbued with a sense of the great responsibility of selecting only such books as would tend to benefit the heads and the hearts, the morals and intelligence, of their hundreds of thousands of readers; and, above all, men whose reputation for integrity would everywhere give the assurance, that no favoritism would be practiced by them in purchasing the books, and that the real interest of the State would be invariably consulted. Let it be said of them as was said by the venerable Chief Commissioner of Primary Instruction in Holland of

another class of educational officers: "*They are men who ought to be sought for with lantern in hand.*" With good and suitable men for this posiion, everything that the friends of the measure and the friends of education hope for, will be secured; but with an unfortunate selection, suspicions may be excited, and this noblest measure ever enacted by the State, imperiled, if not destroyed.

2. *How should these men be selected?* Either designate the Governor of the State, and Chancellor of the State University, as *ex officio* the proper persons; or select two persons, as the Regents of the University are selected, by joint convention of the Legislature, to hold their offices, after the first election, for a term of six years—at the first election, the two chosen to draw lots, one serving three, and the other six years. If two were thus chosen, pay adequate to the actual services rendered, should necessarily be provided; but being paid, they would unquestionably feel the necessity of really *doing the work* confided to, and expected of them; while *ex-officio* members, with their already multiplied official cares and duties, might not be able to bestow upon the subject the additional labors and responsibilities necessary. Besides, there would be an important advantage in having two of the three Commissioners serving long terms, so when there should be a change in the office of State Superintendent, still the experience and settled policy of the Board would not be likely to be hastily or inconsiderately changed or ignored.

3. *How should the books be purchased?* In briefly discussing this question, I must necessarily speak of the mode of their distribution. During my personal visit last year to Superintendents of Public Instruction, and other prominent educationists, in the Western, Middle and Eastern States, and Canada West, I made this subject a matter of special inquiry. When the State supplies School Libraries, the more common mode of procuring the books, after they have been selected, is by contracting with some individual or firm to supply the whole, uniformly bound, at prices mutually agreed upon, or upon the lowest bid; or, as has recently, and I think wisely, been done by Ohio, upon the *best bid*, all things considered. The *lowest* bid is most generally the dearest in the end, as when a large contract is secured by a ruinous bid, the loss that would accrue by an honest fulfillment of the terms of the contract, is avoided by 'the tricks of the trade,' and profits, almost as if by magic, are realized instead of losses.

Indiana made her large purchases for her Town School Libraries by contracting on the lowest terms; then the proper number of volumes were assigned to each town. In Canada

West, under the direction of the learned and able Hon. EDGERTON RYERSON, the books are purchased in suitable quantities direct from the several publishers in Great Britain and America, and a large Depository constantly kept at Toronto, under the supervision of the Superintendent of Public Instruction and the Provincial Board of Education. A catalogue is made out and printed of all the books in the Depository, with their cost prices, and these catalogues sent out to the towns and districts, for the use of the local boards, from which to make their selection, to the amount in value to which they may be entitled. As all the books in the catalogue have been selected with great care, and been approved by the Superintendent and Board of Education, of course the local boards cannot well make a bad selection, unless perchance they should fail to secure the proper variety to suit the various tastes of the community for whose benefit they were designed.

In a country like ours, the people, the great source of power, like to be freely consulted. Hence I am persuaded, that we should strive, if possible, to adopt a system that will most directly *come home to the people themselves*. While I would give the School Library Commissioners large discretionary powers to make the *best* contract, and in the manner which to them might appear, all things considered, the best for the State, I would be strongly inclined to favor this mode of purchase and distribution :

Give the Commissioners optional authority to contract, on the *best terms*, for the books for each year, uniformly and substantially bound, or to purchase them *in sheets* of the respective publishers, and have them uniformly bound by contract on the best terms. Then let the Commissioners have a Depository, prepare a catalogue of the books properly arranged according to subject, with the wholesale cost price, including freight to Madison, together with a brief description, in connection with each book, of its character; and then let the proper officers of each town and city having the matter in charge, select the amount in books to which their town would be entitled, from the catalogue thus furnished them; and as new purchases would be made each successive year, let new catalogues be prepared and sent out to the several towns and cities.

This year the tenth of a mill Town Library tax, amounts in the aggregate on the $168,620,233 70 of the equalized property valuation of the State, to $16,862 02. It will be hardly reasonable to suppose, that the whole of this amount will be promptly collected. Add to this amount, one tenth of the School Fund Income, which will be likely to reach from $17,000 to $20,000, and we shall have altogether not to exceed $35,000

for the purchase of books for School Libraries next spring. To give the towns, or such of them as might wish to do so, the privilege of selecting from the catalogue their portion of the $35,000 worth of books to supply the whole State, would render it necesaary to have a larger supply on hand than the $35,000 would purchase. To illustrate this point: Suppose a person had an order on a book-seller for one hundred dollars' worth of books, and that that book-seller had only one hundred dollars' worth on hand, then the person having the order would have no chance for selecting what he might wish, but must take the lot just as he finds them; but if the book-seller had one-hundred and fifty dollars' worth of books on hand, and all were good and standard works, then there would be an opportunity for a choice. So if the State invests no more than the precise amount which may be on hand next Spring for books for School Libraries, then there can be no chance whatever for the towns and cities to exercise any choice in the selection. To meet this exigency, let the Commissioners in contracting for the books, whether from the several original publishers, or from a single individual or firm, purchase say one-third or one-half more in value, and consequently in variety, than the School Library funds would then pay for, and this excess be contracted to be paid for the following spring; and thus this plan of over-lapping each successive year could be kept up, as long as it might be deemed desirable, without necessarily incurring therefor any additional expense to the State whatever—for publishers generally will gladly make fair terms to secure so large and reliable patronage. As all the books purchased should be of a character calculated for permanent usefulness, what remained over, after the selections of the year had been made by the towns and cities, would go towards making up the collection for the ensuing year.

The School Library Commissioners should give bonds for the faithful performance of their duties, in such amount as the Legislature should deem proper; and all their acts, contracts and vouchers should undergo a rigid examination annually by the Joint Committee of the Legislature for the investigation of the several State Department.

With such Commissioners, such powers, and such a plan for selecting, purchasing and distributing the books, with authority to make the necessary rules and regulations for the management of the Libraries, I should confidently look for the triumphant success of our noble Town School Library system. Then make the Town Board of Supervisors, and City Boards of Education, the local boards for having charge of the Libraries for their several towns and cities, with power to divide

the Libraries into two or three sections, and alternate their localities, if the people could thus be better accommodated than by having the whole kept together in a single collection; and with power also, to appoint the Librarian or Librarians, and when necessary, to designate some small remuneration for keeping the Libraries open at least one half day in each week, to be paid by the Town, or by a cent tax imposed for the use of each volume taken from the Library, or by penalties for over-keeping the books, or from all these sources together.

As to the "just proportion" in which the books should be distributed to the several towns and cities of the State, I do not believe that a better plan can be adopted, than to apportion *pro rata* the amount to which they would be entitled according to the number of children of school age, in the same manner, and upon the same statistical returns, as the annual apportionment is made of the School Fund Income. This, it seems to me, will be alike simple, just, and satisfactory to the people.

Provision should be made, authorizing such districts as see proper to do so, to vote their existing district libraries gratuitously to the town, to be added to the Town Library.

The remaining sections of the School Law relating to District Libraries, should be repealed; and should School Library Commissioners be appointed or elected, to them should be confided the duty of procuring the binding of the State Laws, Journals and Documents already provided by law for the Town Libraries.

Having briefly presented this subject in all its bearings—a subject, permit me to add, to which I have given more than common thought and attention, profoundly impressed with the vast influence it is calculated to exert on the future intellectual well-being of the State—I earnestly entreat for it that consideration from the Legislature which its nature and importance so imperatively demand.

TOWNSHIP SYSTEM OF GOVERNMENT.

I devoted several pages of my former Report to the subject of substituting the Township System of School Government for our present arbitrary, inefficient and troublesome district system. My convictions of the propriety of this change are so decided, that I beg once more to call the respectful attention of the Legislature to the subject. If the change was calculated to impose any additional expense upon the people, I should not, in times like these, deem it either wise or impolitic to urge

its adoption. The Township system has been adopted and works admirably in Indiana, Pennsylvania and Ohio; and has been warmly urged in Massachusetts, by those three able successive Secretaries of the Massachusetts Board of Education, HORACE MANN, BARNAS SEARS, and GEORGE S. BOUTWELL, and some progress has been made in securing this better system in Massachnsetts and Connecticut.

I do not now propose to go again into a lengthy argument upon the subject; but wishing that the matter may *be kept prominently before the people*, even if the Legislature should not deem it advisable to act upon it at present, I will venture to repeat the deductions of my former argument:

Such a system of Township school government, with the abrogation of the district system, would produce, among others, the following beneficial results, viz:

1. The provision of the Constitution of our State, which requires "the establishment of district schools as nearly uniform as practicable," would, by constituting the Township as the district, be more fairly carried out; and hence the State School Fund income would be much more equally distributed than it now is.

2. Taxation for school purposes would be better equalized, for, under the present district system, the people of some districts, owing to the smallness of both their numbers and taxable property, pay two or three times as much as their neighboring wealthier districts, and get no more—often much less in quantity and value, for it; and in joint districts, the several parts composing them, are, from the necessity of the case, very unequally taxed.

3. All the primary schools of the town would be held the same length of time, thus producing an equality of school privileges which does not, and cannot, exist under the old district plan; for instances are not wanting in our State, where a poor and weak district, with great difficulty, and heavy taxation, manages to maintain a three months' school, and that kept by a cheap and perhaps almost worthless teacher; while the adjoining wealthy district, with comparatively light taxation, easily sustains a ten months' school, with an able and successful teacher. This is exceedingly unequal, and bears heavily and unjustly upon the poor, and fails to carry out the heavenly injunction, "Bear ye one another's burdens."

4. By the Township plan, there would be a juster distribution and equalization of teachers, suitable to the several localities; and less of the favoritism practised, as under the present

district system, in employing relatives to teach the schools—for in a Town Board of only three members, there would be less opportunity of practising it than by the present half a dozen to a dozen District Boards in the town.

5. There would be more uniformity and adaptation in school-houses; for they would be built economically, by the lowest and best bidder, and not, as is now too often the case, by one or more members of the District Board, on pretty much his or their own terms; and such localities as now neglect to provide good, comfortable school-houses, would have them provided for them, and the children of such stingy, miserly souls would no longer suffer for a suitable place in which to acquire an education, which would be worth vastly more to them than all the wealth, without it, which their ignorant and niggardly parents could ever heap together.

6. It would not only be a far better, but a far cheaper system to maintain, lopping off the weak, inefficient and worthless schools, and dividing the larger and unwieldy ones; lessening the number of officers, as the Town Board of three officers would perform all the necessary school duties of the town, and do it cheaper and better than the half a dozen or more local Boards of at least six times as many officers; and instead of selecting eighteen or more persons in a township, as is now the case, for these local boards, the people would select three of the *very best and most efficient* for the Town Board. Here would be a great saving of expense, and the objects sought more equally obtained, better in quality, and far more useful to the people.

7. By abrogating the district and joint district system, we should be doing away at once with one of the most fruitful sources of troubles, wranglings, contentions, and petty jealousies, incident to the district system; and would, at the same time, put an end to that greatest bane of the system, the constant ensmalling of districts, to gratify whims and caprices, and oftentimes to adjust an angry controversy, thus steadily lessening the ability of such dismembered districts to either employ a good teacher, or maintain a school even the legal requirement of three months.

8. It would give to the people all over the State the perfect freedom, while taxed in their own town, to send their children to any public school, without regard to district, township, or county lines—thus, in the enlightened spirit of progressive legislation, doing away with an oppressive restriction already too long and too patiently borne by the people, and which has

only been productive of inconvenience, injustice and inequality, and deprived many a worthy tax-paying family of invaluable school privileges.

9. While the primary schools generally cannot well be graded, and but little effected in the way of properly classifying the pupils, yet under the Township system, each town containing a specific number of inhabitants, or a certain amount of taxable property, or both, could have its Central Graded High School, free to all of a certain age, say between ten or twelve and twenty years of age—this Central School to be kept in session ten months in each year. With such a Graded School in each town, for the more advanced youth, the accruing benefits would be of so decided and general a character, that the plan could not but meet with the most universal favor.

10. And lastly, but not least in importance, by this Township system, females—who, by their proverbial love and affection for children, by their patience and long-suffering, and by their thousand winning ways, are so peculiarly adapted by their Creator as the natural teachers of the young—could be employed in nearly all the primary schools, leaving only the Central High School to be provided in part with male teachers; and thus would the same amount of money now expended in a majority of towns in the State, employing for the same district a male teacher a portion of the year, and a female another, furnish to the people fully *one-third* more, and vastly better adapted instruction for the young.

Some such system as this, must, from the very necessities of the case, sooner or later commend itself to the practical good sense of our people. When *they* demand it, as they will, then it will be readily and gracefully adopted. And then, I doubt not, that the people of Wisconsin, like those of Indiana, will only wonder that its very simplicity, economy and admirable adaptation to their very wants, had not long ago made a favorable impression upon their better judgment.

OTHER NEEDED REFORMS.

In my former Report, I favored the adoption of the system of County Superintendents, the formation of a State Board of Education, the procurement of accredited works on School Architecture for each town in the State, the authorization of the State Superintendent to issue Educational Tracts, and a change of time for electing the Superintendent, with an increase of his term of service. I still favor these several mea-

sures, though I do not say it would be advisable to adopt them all at present. The County Superintendency, though great good would, as I firmly believe, grow out of it, yet as it would be attended with considerable expense, I should hardly think it wise to press such a measure in these times of pecuniary stringency. As to the great and pressing need of works on School Architecture—relating to a matter concerning which so much of the people's money is not only wasted, but absolutely devoted to the erection of charnel-houses for their children—I trust the new School Library Law, if wisely administered, will make the necessary provision for this great public want.

NULLIFYING THE SUPERINTENDENT'S DECISIONS.

Last year I pointed out the fact, that Town Superintendents, and Town Clerks, sometimes assumed the prerogative of disobeying the decisions and orders of the State Superintendent; and to meet such cases, section 7th of chapter 203 of the General Laws of 1859 was enacted. There has since occurred a case wherein a majority of a District Board have utterly refused to obey a decision of the State Superintendent in an appeal case—thus virtually nullifying his decision, though the laws declare that all such decisions "shall be final and conclusive." A still further amendment to section 89 of chapter twenty-third of the Revised Statutes is necessary, making it the duty of the Town Superintendent to remove from office any member of a District Board who may be guilty of refusing to carry into effect any decision or order of the State Superintendent, and that such person or persons so removed shall not be eligible for re-appointment.

TRAVELING OF STATE SUPERINTENDENT.

During the past year, the following counties have been visited by the State Superintendent or his Assistant, and addresses generally delivered, in one county at two different points, and in another at three—namely, Dane, Columbia, Green Lake, Milwaukee, Portage, Richland, Rock, Sauk, and Waushara.

NEW EDITION OF THE SCHOOL CODE.

Such was the demand for School Laws, that soon after the adjournment of the last Legislature, a new edition was prepared, including all the amendments and additions enacted at the

last session, and a large number of them have been sent to the several school officers in need of them. Some of the frontier counties had never before had a single copy, and their school officers were greatly at loss to know how properly to discharge their duties, and secure for their districts the benefits and privileges of our system of Free Schools. I found what appeared to me sufficient authority to prepare such revision and order its printing, in Section 64, Chap. 10, and Section 99, Chap. 23, of the Revised Statutes; and in the law relating to Public Printing, which clearly implies that the head of each State Department is expected to judge of the special printing necessary for his particular Department. And added to all this, the pressing necessities of the case seemed to justify the printing of a new edition, even had the provisions of law been less specific in authorizing its publication.

WEBSTER'S UNABRIDGED DICTIONARY.

The 600 copies of *Webster's Unabridged Dictionary*, authorized, by the last Legislature, to be purchased by the State Superintendent, with the consent and approval of the Governor, were obtained of the publishers, who consented to furnish the new illustrated, Pictorial edition, on the same terms as the less valuable edition formerly supplied to the State. They came in good order, and, I believe, have given the highest satisfaction to all the districts receiving them.

The distribution of the Dictionaries on hand has been made to the towns and counties in the subjoined list, in the order of their application:

Bad Ax.—Harmony 4; Union 3; Bergen 3; Greenwood 4; Clinton 3; Whitestown 2; Hamburg 2; Forest 4,.... 25
Brown.—Holland 2; Glenmore 3; New Denmark 4; Rockland 4; Howard 4, 17
Buffalo.—Belvidere 1; Maxville 3; Cross 3; Alma 3; Naples 4,..... 14
Calumet.—Harrison 5; Rantoul 2; Brillion 2, ... 9
Clark.—Pine Valley 3; Lewis 2,..... 5
Columbia.—Columbus 3; Lowville 2; Scott 2, ... 7
Crawford.—Freeman 7; Scott 12; Wauzeka 6,..... 25
Dane.—Berry 1; Dunn 1; Perry 3; Burke 1; Black Earth 2; Madison 2, 10
Dodge.—Beaver Dam 1; Chester 1; Le Roy 1; Portland 1; Ashippun 1; Westford 1,..... 6
Door.—Gibraltar 4; Liberty Grove 1,..... 5
Douglas.—Superior 2,..... 2
Dunn.—Dunn 5; Spring Brook 5,..... 10
Eau Claire.—Bridge Creek 2; Halfmoon 4,..... 6
Fond du Lac.—Rosendale 1; Spring Vale 1; Forest 1; Eldorado 1; Fond du Lac 6; Osceola 5; Metomen 2; Alto 2; Byron 2,..... 21
Grant.—Potosi 3; Blue River 3; Clarno 2, ... 8
Green.—Jefferson 5; Monroe 5,..... 10
Green Lake.—Seneca 4; Green Lake 1; Berlin 3; Markesan 1, ... 9

Iowa.—Mineral Point 3; Mifflin 3; Linden 2; Waldwick 3; Pulaski 7,..... 18
Jackson.—Irving 3; Hixton 3; Northfield 2; Bristol 7,..... 15
Jefferson.—Aztalan 3; Jefferson 1; Concord 2, ... 6
Juneau.—Lemonweir 1; Germantown 4; Seven Mile Creek 4; Lindina 2; Armenia 2,..... 13
Kewaunee.—Carlton 4,..... 4
Kenosha.—Kenosha 7,..... 7
La Crosse.—Jackson 3; Holland 4; Onalaska 4; Farmington 4; Bangor 4, 19
La Fayette.—Belmont 4; Center 2; New Diggings 1; Argyle 3; Wiota 3; Benton 1,..... 14
La Pointe.—La Pointe 1,..... 1
Manitowoc.—Two Rivers 3; Mishicott 5; Gibson 1; Cooperstown 4; Franklin 5,..... 18
Marathon.—Mosinee 1; Jenny 2,..... 3
Marquette.—Buffalo 3; Springfield 4; Oxford 1,..... 8
Milwaukee.—City of Milwaukee 12,..... 12
Monroe.—Portland 10; Angelo 4; La Fayette 4; Adrian 2; Tomah 5; Ridgeville 4,..... 29
Oconto.—Marinette 5; Stiles 3,..... 8
Outagamie.—Hortonia 2; Medina 1; Appleton 2; Embarras 2,..... 7
Ozaukee.—Cedarburg 1; Fredonia 1,..... 2
Pepin.—Waubek 4,..... 4
Pierce.—Diamond Bluff 1; Trimbelle 4; Greenwood 3; Perry 2; Pleasant Valley 3,..... 13
Polk.—Alden 3,..... 3
Portage.—Stevens Point 12; Amherst 4; Almond 6; Stockton 8; Lanark 5; Buena Vista 5,..... 40
Racine.—Racine 4; Burlington 2,..... 6
Richland.—Rockbridge 2; Marshall 4; Dayton 8; Eagle 6; Henrietta 5; Akan 2; Bloom 4; Richland 6; Buena Vista 2; Sylvan 6; Westford 5; Willow 6,..... 56
Rock.—Harmony 1; Newark 9; Beloit 2; Clinton 1; Rock 1,..... 14
St. Croix.—Ceylon 2; Hudson 2; Erin Prairie 3; St. Josephs 1; Hammond 4; Richmond 3; Somerset 1,..... 16
Sauk.—Woodland 2; Freedom 5; Fairfield 1; Baraboo 1,..... 9
Sheboygan.—Mitchell 2; Herman 1; Plymouth 1; Lima 2,..... 6
Trempeleau.—Preston 4; Arcadia 1; Trempeleau 5,..... 10
Walworth.—Sharon 12; Linn 2; Delavan 2,..... 16
Washington.—Hartford 4,..... 4
Waukesha.—Oconomowoc 2,..... 2
Waupaca.—Iola 2; Scandinavia 5; Weyauwega 5; Lind 3; Union 3,..... 18
Waushara.—Oasis 3; Bloomfield 3; Hancock 7; Deerfield 2,..... 15
Winnebago.—Winchester 2; Oshkosh 2; Algoma 1,..... 5
Wood.—Dexter 3,..... 3

Total,..... 613

Supt. of Pub. Instruction in acc't with State of Wisconsin.

1859.		*Cr.*	*Dr.*
Feb. 7th.	To Dictionaries on hand at the settlement with Investigating Committee of the Legislature,.....		7
Aug. 1st.	Dictionaries purchased as per act of Legislature, approved March 17, 1859,.....		600
"	Dictionaries returned from Kenosha County,.....		6
	Distribution of Dictionaries as above (613) as per vouchers in the office of this Department,.....	613	
	Total,.....	613	613

According to the best data of this Department, as given in my last year's Report, not very far from 3,250 Dictionaries had then been distributed, and now 607 others, not reckoning the 6 returned copies which have already been once counted as distributed, and we have a total of 3,807 copies distributed to the several cities and districts of the State. All the copies the State has ordered have been distributed; and there are now applications on file for something like seventy-five copies. Many other districts must be unsupplied, as there are in the State, as shown by the statistical returns referred to in the early part of this Report, not less than 4,331 districts in the State, estimating two and a half parts upon an average to a joint district. This would show 484 districts yet unsupplied; and as new districts are constantly multiplied, and each separate department of a public school is entitled to a copy, it is evident that sooner or later, quite an additional supply will be required. Probably 200 copies might answer for the ensuing year.

OUR FREE SCHOOL SYSTEM, THE HOPE OF OUR COUNTRY.

There are four millions of students, and one hundred and fifty thousand teachers, in the public schools of the United States; or one student for every five free persons. In Wisconsin, with a population of 900,000, we have about 175,000 children attending our Free Schools—or one to every five of our population. In Great Britain there is one student for every eight persons; in France, one for every ten. But Prussia exhibits the largest number in school attendance, and consequently the smallest number who can neither read nor write. In the Prussian standing army of one hundred and twenty-six thousand men, but two soldiers are unable to read; and of two millions and nine hundred thousand children between the ages of seven and fourteen at the last census, two millions and three hundred and twenty-eight thousand were actually attending the public schools. We need here in Wisconsin to take shame to ourselves when we are reminded, that at the census of 1850, out of a population of 305,000, we returned 6,453 persons, over the age of twenty years, who could neither read nor write; and I have been assured by Mr. MAGRAW, the Prison Commissioner, that there are not more than half a dozen inmates in our State Prison who have any claims to scholarship, the great mass being sadly ignorant and depraved. When the census is taken next year, if we have made no improvement, we shall have placed upon the records of the nation the humiliating fact of from *eighteen to twenty thousand* persons, over the age of twenty, unable to read or write. I trust the number may not

prove so large. If we do justice to our children, and afford them every possible means of intellectual improvement within our power, we may feel assured that the time is not far distant, when there will be found within our borders few or none so unfortunate as to be classed among the totally illiterate.

Our Free Schools are emphatically the hope of our country. The knowledge they will impart, with their constantly improved methods, and a higher standard of education, will give to the next generation a power for good, which few are now willing to concede, or hopeful enough to anticipate. And above all, do I delight in the beautiful belief, that the struggling children of poverty of to-day, who are wending their way through swamps, and fields, and storms, and difficulties, poorly clad without, but animated by manly hearts and noble impulses, and firmly bent on the high resolve *to acquire an* EDUCATION—that these noble youth, hungering and thirsting after knowledge, will, a few years hence, wield the destinies of our country, and prove a blessing to millions of our race. A visitor going into a Free School in Boston during a recent half-year examination, observed two fine looking boys, one of whom had just taken the first prize, and the other the second. Said the teacher, "The boy who took the first prize is the son of the man who saws my wood; the boy who took the second, is the son of the Governor of our State." And such must ever be the legitimate results of the Free School system, placing the high and the low, the rich and the poor, upon a common level—where unconquerable devotion and intrinsic worth, however humble or however poor, alone secure the prize.

CHANCELLOR BARNARD'S SERVICES.

First and foremost in this great work of providing a better education for the masses of the people, and, like Saul, the son of Kish, a head and shoulders above all his fellows, is HENRY BARNARD. He comes to us ripe in educational experience, and is devoting, with unflagging energy, the best years of his life to the honor and glory of Wisconsin. In the marked success which has attended the series of Teachers' Institutes held at various points in our State during the past Autumn, we have the strongest assurance for the future. Our Normal Schools, our Teachers' Institutes and Teachers' Associations—these all-important agencies in elevating the character of Free Schools—will all feel the genial influence of his persuasive instructions, and the moulding power of his zeal, his talents, and his genius.

With such a leader, all should feel proud to follow; and for

such an educator, all untiring, as he is, in devising plans for the attainment of a yet higher standard of intellectual improvement, we should all—legislators, school officers, teachers and people—feel it alike a pleasure and a duty to strengthen his hands, and encourage his efforts.

CONCLUSION.

About retiring forever from the position of Superintendent of Public Instruction, I cannot but flatter myself that some progress has been made, during my two years' term of service, in the great cause of primary education in Wisconsin. During that period, there has been an increase of 37,326 children of school age; of 620 school districts; of 272 school libraries, and of 13,369 volumes; and the average for the two years of the number of volumes taken out for reading is considerably more than twice the number taken out the year preceding. The increase of expenditures on school house property has been over $321,000; and an increase of not less than $250,000 has been paid alone for instruction in our primary schools; while the total expenditure for the past two years, for school houses, fixtures, libraries, and instructional purposes has exceeded the sum of *one million, two hundred and fifty thousand dollars.*

There have been, during the two past years, two editions of the School Code prepared and published, and fully 9,000 copies supplied to school officers; 1,164 copies of Webster's Unabridged Dictionary distributed to the districts; not less than 5,000 business letters answered; nearly a hundred appeal cases considered and decided; many thousand circulars and blanks sent forth to every part of the State; the opinions and decisions of the Department for the first time published, and given regularly in the columns of the ably-conducted and valuable *Wisconsin Journal of Education;* and, in repeated instances, State school moneys saved to towns by kindly pointing out errors in their returns, and patiently urging their correction.—Hundreds, if not thousands, of district difficulties have been amicably adjusted, and the cause of education thereby promoted. Several important amendments to the School Code have been secured; and last, though not least, a new School Library system adopted, that has called forth the highest commendations of the wise and the good in almost every part of the Union—a system that must prove an unfailing source of untold usefulness and happiness to the noble army of youth, and "the toiling millions," of our State, for all coming time. The business of the office has been systematized, and attended to promptly; so that, according to the testimony of the Joint In-

vestigating Committee, "a new order of things has been established from that heretofore found in the management of the Department."

So far as I know, no just complaints or accusations have been made, that the appropriate business of the Department has ever been neglected, or partiality or prejudice exercised in giving opinions, or rendering decisions. Whatever complaints have been made against me, relate to reforms and improvements which I have, from time to time, felt it my duty to urge in behalf of the great cause of primary education; and for contending also, earnestly for moral, and as earnestly deprecating sectarian, instruction in our public schools; and pleading for the sacred preservation of the School Fund, consecrated to the education of our children. In view of these things, I feel like adopting the eloquent and touching language of BURKE: "No! the charges against me are all of one kind—that I have pushed the principles of general justice and benevolence too far—further than a cautious policy would warrant, and further than the opinions of many would go along with me. In every accident which may happen through life, in pain, in sorrow, in depression, and distress, I will call to mind this accusation, and be comforted."

LYMAN C. DRAPER,

Sup't of Public Instruction.

MADISON, Dec. 10th, 1859.
